Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

This house faces south and is located on a sequestered, wooded site between Maryland Route 231 and 4th Street and Maryland Route 2/4 and Main Street or Maryland Route 765. It is a three-bay framed and weatherboarded I-house set on a brick foundation and with brick ridgeline chimneys built along the interior passage walls. One bay of the house is two rooms deep, but this extra room, normally accommodated in this house form in a rear shed or ell, is sheltered under the main gable roof. The roof covering is standing-seam sheet metal. The weatherboarding has been replaced, but the siding is still wood. There are cornices at the eaves and cornice returns on the gable ends. The main doorway is sidelighted and transomed and it is flanked by six-over-six double-hung-sash windows. There is a one-story hipped-roof front porch set on a new poured concrete foundation. It is supported by chamfered posts. There is a pediment over the central bay. A one-room rear ell addition looks like it was built around 1940. There is a modern brick shed added onto the ell in association with the pool.
